# Next.js/React Native Developer

Computer Engineer

## PROFILE

React Native Developer and Computer Engineer building production-level mobile, web and desktop products. Experienced with React Native, Expo, Supabase, Next.js and REST API integrations, with a strong focus on multi-platform product architecture, AI-assisted systems, offline-first workflows, modern UI/UX and clean state management.

## EXPERIENCE

### RehberimGO

Lead / Full-Stack & Mobile Developer | 01.26 - Present | Sakarya, Turkey

- Building a multi-interface operations platform with Next.js panels, customer web flows, Android tablet workflows and iOS/Android apps.
- Designing service delivery, field operations and AI bot-supported workflows on a scalable Supabase-backed architecture.

### OTOKAR Otomotiv ve Savunma Sanayi A.Ş.

Intern | 08.2018 - 09.2018 | Sakarya, Turkey

- Developed a personnel management interface using ASP.NET MVC to support staff control and operational data management.
- Gained practical experience in interface development and corporate software workflows within a real production environment.

## SELECTED PROJECTS

**RehberimGO** — Field-ready operations platform for service businesses: Next.js admin panels, customer service web flows, Android tablet staff app and iOS/Android customer apps. Reference: [rehberimgo.com.tr](https://rehberimgo.com.tr).

**Just Randevu** — Scheduling and business management web product for barbers, salons and clinics, covering calendar, customers, staff, services, packages, stock and finance workflows. (In development)

**Venus Jump** — Playable TypeScript/Vite Canvas arcade jumper with platform logic, collectibles, score tracking and responsive browser gameplay. Reference: [venus.emrebc.com](https://venus.emrebc.com).

**Neon Subtitle Studio** — Offline-first desktop subtitle tool built with React, TypeScript, Vite, Tauri and Python, focused on local subtitle generation, editing, export history and audio/video processing workflows.

**ShotBrief** — Local-first AI brief builder for App Store/Google Play screenshot production, turning raw app screens into structured briefs, exports and QA-ready packages.

**Mobile Quiz App** — React Native and Expo quiz app with Supabase backend, offline-first support, level / XP / reward mechanics, Zustand state management, theme switching and modern animations. (In development)

## EDUCATION

### Sakarya University

B.Sc. in Computer Engineering | 09.2016 - 01.2021 | Sakarya, Turkey
